## THE CLAIMS

Please amend the claims to read as follows:

1. (Currently Amended)

A game adapted to be played on a grass surface, the game comprising:

one or more solid-surface game obstacles structured to cause a game ball to change vertical position relative to a playing field to which the obstacles are attached after said ball has been struck.

wherein at least one of the game obstacles is structured to cause a ball to bank around a corner, and the game obstacles are structured to be temporarily affixed to the playing field.

## 2. (Cancelled)

- 3. (Currently Amended) The game of claim [[2]] 1 wherein at least one obstacle comprises at least two receivers through which at least two securing stakes can be respectively passed.
- 4. (Original) The game of claim 3, further comprising at least two securing stakes each having a first portion structured to pass through one of the receivers, and each having a second portion structured to mechanically interfere with a portion of one of the receivers to secure the at least one obstacle to the playing field.
- 5. (Original) The game of claim 4 wherein the stakes are coded to identify a game ball or game player.
- 6. (Original) The game of claim 3 wherein at least one of the receivers comprises an eyelet.
- 7. (Original) The game of claim 3 wherein at least one of the receivers comprises a lug.
  - 8. (Withdrawn) A method of playing a yard game, comprising: selecting a unique game ball; associating one of a plurality of solid-surfaced game obstacles to the game ball; and

striking the game ball with a mallet to cause it to negotiate the associated obstacle, the associated obstacle structured to allow lateral movement of a ball while negotiating the obstacle.

- 9. (Withdrawn) The method of claim 8 wherein associating one of the game obstacles to the game ball comprises attaching a flag to the game obstacle, the flag associated with the game ball.
- 10. (Withdrawn) The method of claim 9 wherein the flag is associated with the game ball by color.
  - 11. (Withdrawn) A helical loop yard game obstacle, comprising: a main surface having a generally helical curved shape; and first and second raised edges attached to side edges of the main surface.
- 12. (Withdrawn) The obstacle of claim 11 further comprising at least one receiver coupled to an edge of the obstacle and structured to accept an attaching device therethrough.
- 13. (Withdrawn) The obstacle of claim 12 wherein the attaching device is a stake.
- 14. (Withdrawn) The obstacle of claim 11 wherein the main surface is wider than the diameter of a game ball.
- 15. (Withdrawn) The obstacle of claim 11 wherein the obstacle has an entry end and an exit end, the obstacle further comprising a flange coupled to the entry end.
- 16. (Withdrawn) A curved yard game obstacle having a solid rolling surface, comprising:

an entry portion adjacent to a playing surface;

an exit portion; and

a curved middle portion between the entry and exit portions.

- 17. (Withdrawn) The obstacle of claim 16, further comprising an edge attached to an outside radius of the curved middle portion, the edge structured to change direction of a game ball that is negotiating the obstacle.
- 18. (Withdrawn) The obstacle of claim 16 wherein the middle portion is elevated compared to the entry portion.
- 19. (Withdrawn) The obstacle of claim 16 wherein an outside radius of the curved middle portion is elevated compared to an inside radius of the curved middle portion.
- 20. (Withdrawn) The obstacle of claim 16 wherein the exit portion is adjacent to the playing surface.
- 21. (Withdrawn) The obstacle of claim 16, further comprising at least one receiver coupled to an edge of the obstacle and structured to accept an attaching device therethrough.
  - 22. (Withdrawn) An inclined pipe game obstacle, comprising:
- a pipe-shaped main body having an entry end and an exit end, the main body shaped to accommodate a game ball traveling therethrough; and
- a rest positioned underneath the main body and between the ends, the rest structured to elevate the exit end of the main body.
- 23. (Withdrawn) The obstacle of claim 22 wherein the pipe-shaped main body is circular in cross-section.
- 24. (Withdrawn) The obstacle of claim 22 wherein the pipe-shaped main body is oval in cross section.
- 25. (Withdrawn) The obstacle of claim 22 further comprising a flange attached to the entry end.
- 26. (Withdrawn) The obstacle of claim 22 further comprising a clamping device structured to affix the entry end of the main body at a playing surface.

Docket No. 2916-003

Page 4 of 8

Application No. 10/753,836

- 27. (Currently Amended) A croquet obstacle set, comprising:
- a first obstacle structured to be temporarily secured to a playing surface and structured to ramp a croquet ball that enters an entry portion of the first obstacle;
- a second obstacle structured to be temporarily secured to a playing surface and structured to cause a croquet ball that enters an entry portion of the second obstacle to travel in a helical loop;
- a third obstacle structured to be temporarily secured to a playing surface and structured to bank around a curve a croquet ball that enters an entry portion of the third obstacle; and
- a fourth obstacle structured to be temporarily secured to a playing surface and structured to ramp through an inclined tunnel a croquet ball that enters an entry portion of the fourth obstacle.
- 28. (Currently Amended) The croquet set of claim 27 wherein at least one of the obstacles [[is]] structured to be temporarily securable to a playing surface through includes a securing device coupled to the at least one obstacle.
- 29. (Original) The croquet set of claim 28 wherein the securing device is a receiver through which a stake can pass.
- 30. (New) The game of claim 1, wherein at least one of the game obstacles is structured to cause a ball to follow a helical path.
